Summary

Software Engineer with production experience across the full stack (TypeScript, Next.js, React, Node.js, PostgreSQL) and a systems-programming foundation from building a custom HTTP/1.0 server in C++ (non-blocking I/O with epoll, benchmarked against NGINX). Shipped InsureNow, an InsurTech platform with multi-step workflows, real-time dashboards, and secure authentication. Experienced auditing and taking over existing codebases, performing zero-downtime schema migrations, integrating third-party APIs, and fixing production regressions. Strong foundation in algorithms and system architecture from 1337 School (UM6P). Autonomous, analytical, and effective collaborating remotely with clear, proactive communication.

Technical Skills

- **Languages & Core Stack:** TypeScript, JavaScript, C, C++98, Next.js (App Router), React, Node.js
- **Systems Programming:** non-blocking I/O (epoll), CGI, HTTP/1.0 internals, concurrency
- **Data Layer:** PostgreSQL, MySQL, Prisma ORM, schema design, zero-downtime migrations
- **API & Integration:** REST APIs, JWT/session auth, third-party API integration (SIREN/SIRET, Claude API)
- **DevOps & Tools:** Docker, Docker Compose, NGINX, SSL/TLS, Git, Linux, Vercel, Railway
- **Other:** Tailwind CSS, n8n, Tesseract.js (OCR), pdf-lib, SPF/DKIM, SMTP, Bash

Professional Experience

Software Engineer — InsureNow (InsurTech, Remote) (Sep 2025 – Mar 2026)

- Designed the PostgreSQL data layer (Payment, Contract tables) and performed zero-downtime schema migrations using guards
- Built multi-step insurance quoting workflows across 4 sectors with real-time dashboards for admins and clients
- Implemented secure authentication: password-reset with session termination, SMTP verification (SPF/DKIM)
- Built an async document pipeline: automated PDF generation (pdf-lib), OCR (Tesseract.js), integrated with n8n
- Integrated third-party APIs (SIREN/SIRET); audited and fixed a critical mobile layout regression on a 10-step form

Stack: Next.js, React, Node.js, PostgreSQL, Prisma ORM, n8n, pdf-lib, Tesseract.js, Git

Projects

- **Inception-of-Things** (K8s Infrastructure) — Multi-node K3s cluster via Vagrant (controller/agent), Ingress-based routing for 3 apps, GitOps CD pipeline with K3d + Argo CD syncing from GitHub, self-hosted GitLab via Helm
- **Upwork Offer Matcher** — AI job-matching platform (Next.js, PostgreSQL, Claude API, Apify); scrapes and ranks listings by fit score, deployed on Railway
- **Inception (Docker Infrastructure)** — Multi-service Docker setup (NGINX, WordPress, MariaDB) with secret management and a custom network
- **EPS Platform** — Full-stack platform (Next.js, PostgreSQL, Railway) with authentication and production-ready architecture

Education

- **1337 School (UM6P), Benguerir, Morocco** — Peer-to-peer engineering curriculum: algorithms, system architecture, low-level/network programming (Oct 2023 – Present)
- **Faculty of Sciences Semlalia, Marrakech, Morocco** — Bachelor's Degree (Bac+3), Mathematics and Computer Science (Sep 2020 – Jun 2023)
- **Lycée Cheikh Mohamed Lghdaf, Tan-Tan, Morocco** — Baccalaureate, Mathematical Sciences track (Sep 2019 – Jun 2020)
